

# AI Document Summary & Interaction Tools

---

## Sharly AI

An AI tool that provides concise summaries of various content types, including PDFs, articles, audio files, and presentations. It also allows users to chat with documents and customize AI behavior for specific needs.

 Website: <https://sharly.ai/ai-summarizer>

## docAnalyzer.ai

Offers chat-based intelligent conversations with documents in multiple formats. Users can upload various document types and ask direct questions to receive context-aware answers.

 Website: <https://docanalyzer.ai/>

## QuillBot Summarizer

Utilizes AI to instantly create shortened versions of text, aiding in efficient reading and note-taking. Users can input text directly or upload documents for summarization.

 Website: <https://quillbot.com/summarize>

## Petal

An AI-powered document analysis platform that enables users to chat with their documents. It provides context-aware generative AI responses and integrates with users' knowledge bases for accurate answers.

 Website: <https://www.petal.org/>

## Adobe Acrobat AI Assistant

Enhances interaction with PDFs by allowing real-time conversations with documents. Users can ask for summaries, clarifications, and definitions, with an attribution engine linking summaries to sources within the document.
